

My name Julia, I am an author and scientist.

I am acting on behalf of the Russian team of scientists regarding the project in the production of the, '5G Protection USB Rezotone Key'.

Over these years I invested lots of effort and funds to help develop this technology. It was

my plan to open in London stock market this technology in 2008, but the collapse of the worldwide economy stopped this. Why this product such a unique?

USB REZOTONE protected all living organisms from 5G negative effect, but at the same time did not interrupt work of the any gadget which working on 4, 5 G technology. However production are very limited due to the complexity of the technology using multiple processes to create a mini computer in the key.

Rezotone USB device was created in 2011, it has a license issued by the Russian government and 5 patents.

Each rezotone hand made, it is 5 stage, after each stage check up process, all which not satisfied 100% will be rejected, 2 team of scientists involved and after # 3 team added their programs, and many of this programs was patented.

So from each rezotone part of the profit goes to each patent holder, to team of engineers, for the new parts and to further research. (plus agents %, bookkeeper %, web. artist payment, editor for the website, shipping cost, banks transfers, etc.)

Even cover for the USB was carefully chosen, which have most best plastic which letting programs go via easy...they did order 100 covers from each factories on the planet, who produce them and check and finally found most best one.

When there was an explosion at Fukushima Nuclear plant, the Russian far East was protected from radiation by similar programs on

flash USB cards, they were put on cell towers.

Because these USB REZOTONE can protect the house, the room and the people inside. A Russian team of scientists has collected

data from 3,000 people who have already used USB REZOTONE over the past years. Some of these people worked in highly toxic radioactive and electromagnetic hazardous areas. But by using a protective USB REZOTONE, it gave them extraordinary positive health results with no side effects from radiation.

Originally I contacted Sacha Stone and Simon Parkes in April 2019. It was with the intention from the very beginning to start producing the USB's for Connecting Consciousness members. I thought, by mistake, that Sacha Stone was also associated with Connecting

Consciousness, so I proposed that Sacha Stone members could also receive the USB's. At that time Sacha Stone was represent MAHARA LTD company.

I did bring samples of USB Rezotone to London, spent 2 weeks in London with the presentations about REZOTONE technology to Sacha Stone & Jacques Bauer and other people. During this weeks, as a result of constant daily contact with the Russian scientists, was collected information in order to launch new company, open website and start public presentations.

Website «5Gbioshield» was created.

Sacha Stone flew to Los Angeles for the presentation, second presentation was in London on September 25th 2019.

THE ONLY FULL SPECTRUM DEFENCE AGAINST 5G

<https://www.bitchute.com/video/laDp7mmESgP5/>

THE SCIENCE BEHIND THE 5G REZOTONE SHIELD

<https://www.bitchute.com/video/LcMjBuhn7XFu/>

There was no agreement in place. Financier V. Kolesnikov that represents the Russian side, sent his financial model and proposal to MAHARA LTD. There has been not been any reply.

The group of Russian scientists were watching for developments, and were really surprised there was not any proposal from Sacha Stone side to my team about payment in this deal. As that was the case, it rude and unacceptable.

Russian scientists there are feeling that this is quite shameful. We all are considered as one group and by acting this way has been disrespect to all concerned.

MAHARA LTD wished to move production out of Russia and to start production in a very large quantities.

Russian scientists simply cannot produce such a huge amount. Production proven, it is around then 100-150 USB key a month max and will stay this way. Consequently no agreement was signed.

As anyone can understand, the testing period went badly. The Russian Rezotone model had not yet gone live. So instead of the Russian USB, new company “ 5G bioshield” simply decided to mimic original USB. They found USB which was selling on Amazon. They added a

sticker and started selling as a device which can protect people from radiation!

On the website all information which was about USB REZOTONE remained almost without any changes. All ideas, Rezotone abilities and how programs worked, pictures, testimonials, all of this was about the original Russian USB REZOTONE.

The few changes, which they made sounded tricky and unprofessional.

For example in order in some cases to start to feel if it was protecting the purchaser from

radiation it may sometimes take few weeks!

Just check on main page of the 5gbioshield.com: it is manipulation of the CC members mind !

Or

5GBioShield USB Key provides protection of your home and family and the wearable holographic nano-layer catalyzer, which can be attached to the smartphone or any other electric

radiation emitting device. It did not say from what this protection was from. NONE !

FAQs

DOES the device remove EMF ? Can I use a meter to measure EMF ?

The 'electro magnetic meter' can only measure the intensity of radiation which is not changed

by our technology.

Simon Parkes Connecting Consciousness members end up in hands of team of scam artists and charlatans!

Distribution with new USB started in January 2020. Videos of 2 presentations from 2019 about USB REZOTONE in USA and London were used on YOUTUBE, underneath the video was placed a link to purchase the new 'Laki' USB

from “5Gbioshield.com”. They were using our genuine patented technology and information about our genuine product to sell their 'Laki' powered by his 'Divine Consciousness', embedded in glass, not crystal like found on Roswell UFO as had been claimed by Simon Parkes in his Connecting Conscious video. This is why customers who bought at first the REZOTONE USB and then after a USB from the new «5G bioshield»Co , thinking that it was a second version of the REZOTONE, key. Each and

everyone who got the 'new' glass with sticker Laki '5Gbioshield' model all felt the difference (no power) and quickly sent back this USB from “5G bioshield” and asked for refund.

People thought that this is a new version of the Russian USB REZOTONE. Here for example just one Testimonial.

(short version)

Amie, LA, USA, 21th of January 2020

“I currently have three of your USB devices when they were sold on “5gbioshield.com”. (Now they sell something else that doesn’t work!) I love your USB REZOTONE keys. They even help with my gas mileage in my car by 4 mpg! I would like to buy three more from your new website, so I can add a couple more in my house for 5g protection and one permanently in my car. A few months later I watched Simon Parkes advertising it. <https://www.youtube.com/watch?v=5XN7ZjSx1sw&feature=youtu.be>

When the “new” USB keys came up for sale, I purchased thinking it was your USB key with a visual redesign. We tried the new keys for about a week and got no result. I didn’t say anything to my fiance. He came to me that week and told me what I already knew. He dowsed the new keys and got a zero

response. Those keys do absolutely nothing. The company was nice enough to let me send them back for a refund. Simon also put out another video to clarify that it was a different key. That was when I researched and found your new website, so I could order the real ones. Those other scientists claim their USB key is made out of crystal and are made in limited quantities [On. 5gbioshield.com](https://5gbioshield.com). USB cost 350\$...Well I found that same exact USB key they sell on

Amazon for \$10. It isn't crystal. It is glass and mass produced in

china. https://www.amazon.com/Flash-Crystal-Memory-WaterproofPendrive/dp/B07ZT2PSSF/ref=sr_1_5?crid=1TX6PEUF5GY82&keywords=crystal+usb+flash+drive&qid=1579439639&srefix=crystal+usb%2Caps%2C163&sr=8-5 “

People taking a look at whether the 5G Apocalypse video, made by Sacha Stone was a tool to make millions of \$ capitalizing on people's fear of death from the global 5G roll out.

Letters from Russian law firm was sent to Simon Parkes and to Mahara LTD, which created 5Gbioshield.com, warning they they may receive invitation by the court regarding illegal activities, fraud. Please see attachment #1.

Takedown Request to close « 5Gbioshield.com » was register on December 19th 2019.

Patent, certificate was translated and notarized. Attorney was ready via court close website « 5Gbioshield », but it will not preventing « 5Gbioshield » simply to re-name website and open under new name. This is why we did not go further.

USB REZOTONE via USB from « bioshield»

REZOTONE:

YES, it did not show that radiation change, but it show that parameters of the body: blood, water, brain activity and so on were not affected...and it was proven with the 5 patents, license and certificate.

Pr. Lakisevich telling that his sticker also created the same effect, but he doesn't have any patents, no certificate, nothing real to support his claims. He did receive an invitation from

Russia scientist to visit Russia and conduct check up and possibility to receive certificate, but he denied invitation and did not want to do testings.

Jacques Bauer scientific part about REZOTONE still now on "bioshield" website. Many people

told that it looks totally alike.

So we did removed Jacques Bauer results from REZOTONE website and now on our website show independent results from 2 professors. But we can send and you can easy compare.

And now '5Gbioshield' sending 'independent' result, again from Swiss, for sure 'independent'

result should be done independently and arrived not from «bioshield»

Simon Parkes did say that USB from «bioshield» was better than REZOTONE, but why then is he himself using REZOTONE since November 2019? Even after numerous letters from lawyers, he still did not want to return the 3 Rezotone USB's back. He advised his people, friends and favorite coordinators of CC to buy REZOTONE and even giving my private e-mail addresses to all of them. Jacques Bauer, Anna Grochovalskaia, Sacha Stone, all of them are using our REZOTONE USB.

5G Apocalypse London Jacques H Bauer
https://www.youtube.com/watch?v=oJ43utmcm_c start on 47 00 min about RUSSIAN USB REZOTONE SACHA STONE had our USB as a samples

[About Pr. Lakicevic from Serbia now, creator of USB from «bioshield»](#)

You can see him here:

<https://www.youtube.com/watch?v=5XN7ZjSx1sw&t=473s>
on 19 00 min he is talking about his « secret « which is in reality «Sticker on a plastic toy» !

Pr. Lakicevic we all asking you: PLEASE stop your «BABY TALK» !!! This Serbian doctor sadly is scanty in his capabilities. One consolation is that such fake USB products from them, are not worth the materials they are made of. It is based on his DECA, holographic image and ONLY.

Answer from the Russian scientists, creators of USB rezotone. Here from main creator of USB REZOTONE regarding this Serbian DECA in USB from <https://5gbioshield.com>

"Efficiency of hologram 15%, placebo effect. 85% remains unchanged. The effect does not increase on the amount. The efficiency of this device in USB even less, compared to our it only 6%. Truth in the <https://5gbioshield.com>

«Fifteen years ago, I received a copyright in the United States for a volumetric image album published in Russia in 2000. It was translated into English and was being prepared for publication. It contained detailed meditation instructions for each image and a holographic method of concentration, which allows to enhance the effect of the proposed harmonious forms. This image from Serbian person, name LAKI is just a miserable and incompetent repetition and is actually an inhibitor that deprives you of strength. For stressful conditions and for hypertension, this form is acceptable, but for a short time, because it plants the kidneys and causes brain edema ... and then there is the so-called renal pressure, which, in turn, can text on

2%, regarding this new made off."

lead to stroke in some people.»

Since the end of 2000 Serbian person 'Laki' is unemployed. He did not used professional laboratory with suitable equipment for the last 20 years. He called himself GOD. «I am GOD also»

<http://teslastyle101.com/curriculum-vitae/>

When our lawyer Mr. R. from London called to him, instead woman pick up the phone, who take care about Pr. Lakicevic. She told that he is very unstable, screaming, very rude, swearing, and she think he was removed from research institute, because of his mental sickness, possible schizophrenia.

So again: why USB cost \$350 plus shipping? It's only empty plastic, looks like USB, with the sticker which cost 14 \$.

[radiating-devices/dp/B07KYD6S81](https://www.amazon.co.uk/B07KYD6S81)

<https://www.amazon.co.uk/OMNIA-RADIATION-BALANCER->

***Pr. Lakicevich (Serbia) mentioned about LOVE and INTENTION which in this glass part of the USB. This means that in order to avoid 5G radiation each person should put "intention" into this glass part of USB ?

Placebo effect yes, can be up to 15%, maybe it will be good for the meditation, but again it will not stop boiling blood and water in your body. This Chinese & Serbian made Serbian USB, has no patent or license. In a word, he can talk and talk at random, but we instead make and receive test certificates, in particular, on radioactivity.

Without acts of strict testing, certificates and patent (we have 5 patents), all words are empty chatter. None of the talkers ever agree to strict testing. Serbian creator of this fake USB, don't want to do the testings! If he were a real scientist, he would not refuse to cooperate, because we Russian scientists sent to him very attractive scientific proposal.

**USB from '[bioshield.com](https://www.bioshield.com)' has no electronic components and is simply a sticker stuck onto the new device. Why then does it need to be on a USB stick anyway ? Why does it need to be attached to an electrical circuit when it is not electronic according to Serbian Laki ? Answer is obvious: Just to mimic RUSSIAN USB REZOTONE which gain great success. They just decided to earn money on the positive feedback from Rezotone USB. Regarding this, letter was sent from Russian law company already to '[bioshield.com](https://www.bioshield.com)' twice

Kimberly Steele, California, USA

WHAT UNBELIEVABLE LACK OF CONSCIOUSNESS
SACHA STONE HAS! ALL I CAN SAY IS KARMA IS
GOING TO BITE HIM.

In this video he is taking about all the technology that he and Simon Parkes evaluated with assistance from 5G REZOTONE SHIELD for many months, and then try to make it look like it's associated with the supposedly newest greatest technology they call '5G BIOSHIELD'. Where's the science to prove that? If it's so new and great, why doesn't their website show the patents associated or any of the research associated with their product? All the very impressive credentialed scientists he talks about in this video are shown on 5G Rezotone Shield's site

here: <https://5grezotoneshield.com/> So, how conveniently confusing is it that he shows in this video the 5G Bioshield logo next to the 5G Rezotone Shield USB stick? Also in this video, he says to understand more about the science come talk to me after the show. Their

site, <https://5gbioshield.com/science-research/> is loaded with all kinds of other people's Quantum science and research but I couldn't find anything directly related to the 5G Bioshield. I doubt the users of their device experience anything and they are charging the same amount as the REAL 5G Rezotone Shield device.

Many people are searching these days for this Russian USB device, which is excellent protection against 5G. <https://5grezotoneshield.com>: [.info@5grezotoneshield.com](mailto:info@5grezotoneshield.com)

YOUTUBE VIDEO : <https://www.youtube.com/watch?v=97-J0FsuEM8>

DON'T buy this USB Stick.

2 004 832 , 2 million people saw this !

BioShield sells regular 128-megabyte USB flash drives for \$ 350 under the guise of protective screens against malicious 5G radiation

Компания BioShield продаёт обычные 128-мегабайтные USB-флешки за 350 долларов под видом защитных экранов от вредоносного 5G излучения

https://overclockers.ru/blog/Splash_Attack/show/37443/kompaniya-bioshield-prodaet-obychnye-128-megabajtnye-usb-fleshki-za-350-dollarov-pod-vidom-zaschitnyh-ekranov-ot-vredonosnogo-5g-izlucheniya

REPLYS, from Russia under this article:

They will need to prove that this USB keychain "creates a holographic field with nanolayers", not that the USB keychain

itself absorbs something. Moreover, this field should be sufficient to "protect the family and home". And to prove this they need to prove the existence of holographic fields with nanolayers or explain what they meant by these words. Maybe they had a holographic sticker in mind?

According to the presumption of innocence, the authorities need to prove that this device does not create holographic fields with nano-layers.

The presumption of innocence applies in criminal and administrative law. It also refers to a civil lawsuit to close the company. In this case, the trial is adversarial in nature, when both

parties must present their arguments. And for a criminal case, it will be enough to add the conclusion and testimony of an expert and specialist to the case.

Team co-ordinator and visionary.

JULIA
